

How To Use EAFC24 Sniper Bot!

1. Using google chrome open the fifa web app
2. On the transfer tab open 'SEARCH THE TRANSFER MARKET'
3. Right click on the screen and press inspect element

4. First click the symbol on the right (blue circle)
Then click the symbol on the left (red circle)

Should now look like this

5. Then open the 'console' tab and copy & paste the EAFC24 bot code in and press enter. This should bring up the bot on the page and you can now close the console. If this fails to happen open a new tab and try again making sure you copy all the code in.
6. Put in the filter/player you want to search as you would normally and the max BIN you want to snipe for – this will snipe any cards listed at this price or lower when you start the bot.

MAKE SURE YOUR FILTER IS 100% CORRECT BEFORE PRESSING START

Bot settings

Clear TL = clear transfer list

List = if checked this will auto list sniped players for the min and max price you input

RPM = is searches per minute – the quicker the RPM the quicker you will get a captcha
